

## FARONICS POWERSAVEMAC™

### ❖ Automated Energy Conservation ❖ Power Save Benefits

Faronics Power Save Mac dramatically reduces an organization's operating costs by eliminating computer energy waste. In fact, for every 1,000 computers Faronics Power Save Mac is deployed on, organizations will save up to \$40,000 per year.

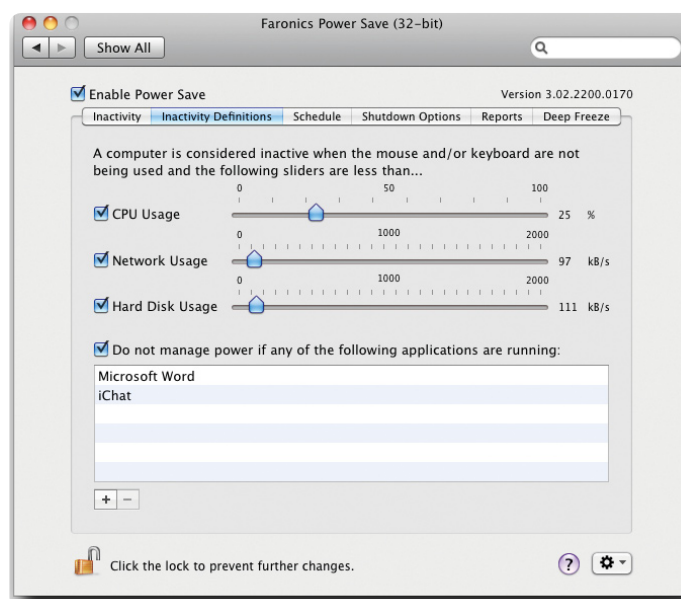

Faronics Power Save Mac keeps computers running when users need them, powers them down when they are inactive, and can prove its rapid return-on-investment through energy savings reports. Power Save Mac is also the only computer energy management solution that analyzes CPU, disk, keyboard, mouse, and application status before taking power management actions.

- Provides computer energy management that is non-disruptive to IT and end-users
- Provides tangible financial savings to organizations by reducing computer power consumption
- Proves rapid return-on-investment through enterprise-wide tracking and reporting
- Strengthens IT control over network systems while promoting user productivity at all times
- Fosters feasible environmental responsibility that is easy to deploy and manage

**“We’ve deployed Power Save enterprise-wide on all our computers, which is saving us over \$50,000 per year in energy costs. That’s \$50,000 that we now have to buy new IT equipment and software, hire more personnel, or invest into employee training.”**

*– Sung Lee, Director of Computer Support, Howard Community College*

Customize Power Save Mac's energy management settings to suit user needs.

## Key Features

### Intelligent Configuration Settings

- Define inactivity settings based on CPU usage, network usage, hard disk usage and important applications
- Customizable user warning times
- Automatic start-up prior to Deep Freeze maintenance window
- Computer, display and hard drive sleep setting options
- Shutdown without the loss of user productivity
- Power Save Mac is able to automatically apply an Energy Consumption Profile to a workstation for grouping and reporting

### Flexible Scheduling

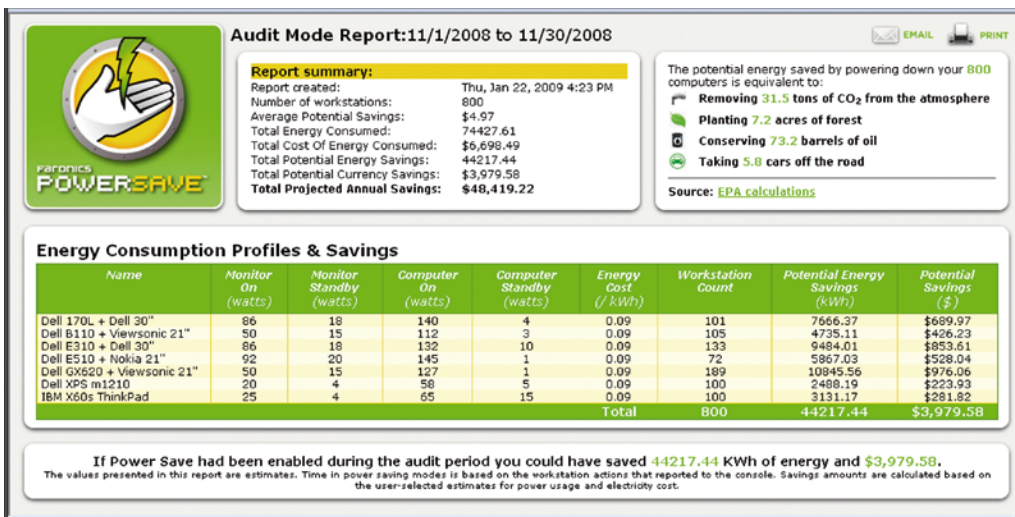

- Configure the computers to start up, shut down, sleep and wake
- Choose if the action will occur as a one-time-only event, every day, on weekdays, on weekends, or a specific day of the week
- Choose a specific time of day for the action to occur
- Designate the number of minutes of computer inactivity before log-out, restart, or shutdown
- Enable Auto-cancel to override scheduled events if computer is active or choose to allow users to override scheduled actions and avoid losing data

### Compatibility Options

- Tasks can be installed into Apple Remote Desktop (ARD) to enable remote management
- Power Save Assistant allows customized installation packages to be created and deployed with ease across your multiple-Mac environment
- Runs natively on Intel or Power PC-based Macs
- Localized in five languages: English, French, German, Spanish and Japanese

### Advanced Reporting Functionality

- Generate energy use and savings reports through Core Console
- Summary and Detailed reports allow you to see how much power you are saving based upon your regional electricity cost
- Audit mode provides a baseline measure of the energy being consumed, making it easy to determine the value of the projected savings generated when Power Save's features are enabled
- Power Save reports on the environmental benefits that have been achieved by reducing computer energy waste

“We’ve deployed Power Save enterprise-wide on all our workstations, which is saving us over \$50,000 per year in energy costs. That’s \$50,000 that we now have to buy new IT equipment and software, hire more personnel, or invest into employee training.”

– Sung Lee, Director of Computer Support, Howard Community College

### System Requirements

Power Save Mac requires Mac OS X Panther 10.3, Tiger 10.4, Leopard 10.5, or Snow Leopard 10.6. Power Save Mac is a Universal application (Intel and PPC compatible). ARD integration requires Apple Remote Desktop 2.2 or higher. A minimum of 256 MB RAM is recommended.
